

MANAGEMENT OF PORTFOLIOS

Practitioner Exam Workshop

Introduction

Portfolio management is defined as a coordinated collection of strategic processes and decisions that together enable the most effective balance of organizational change and business as usual. Management of Portfolios (MoP®) approaches the management of change projects and programmes from a strategic viewpoint. It provides an overview of all change activities including what is in the portfolio, what it is costing, what risks are faced, what progress is being made, and what the impact is on business as usual and the organization's strategic objectives.

This is the 1 day approach to gaining the Practitioner qualification. It is an intense course that will require delegates to prepare thoroughly via interactive learning prior to course attendance. The course includes the Practitioner examination.

Target Audience

This course is ideal for any staff involved in Portfolio management roles and wish to gain an understanding of best practice, as well as a qualification, for example:

- Portfolio sponsors, owners and company directors
- Portfolio managers and Portfolio directors
- Portfolio office managers and support staff
- Programme and Project Sponsors
- Programme Managers
- Business Change Managers
- Operational managers involved in portfolios and programmes

Course Benefits attendance for individuals

- Highest level qualification
- Application of MoP® common vocabulary.
- Increased confidence in real world application.
- Thorough knowledge of the MoP® methodology at theory and application level.
- Ability to apply MoP® to scenarios and real world situations.
- Ability to explain the benefits
- Delegates will be fully prepared to take the MoP® Practitioner examination

Course Benefits attendance for the organisation

Include achieving competence in your managers should deliver:

- More of the 'right' programmes and projects being undertaken in terms of greater financial benefits and measurable contribution to strategic objectives, removal of redundant and duplicate programmes and projects.
- More effective implementation of programmes and projects via management of the project development pipeline, dependencies and constraints; and redirecting resources when programmes and projects to do deliver or are no longer making a sufficient strategic contribution, thus more efficient resource utilization.
