

Learn how to effectively manage risk at strategic and operational levels with M_o_R[®] certification.

Almost every decision taken within an organization has an upside and a downside and involves some degree of risk.

Management of Risk (M_o_R) considers risk from different perspectives within an organization: strategic, programme, project and operational.

M_o_R provides a robust yet flexible framework that allows organizations to assess risk accurately and consistently.

Benefits include:

- A better base for developing strategy
- Greater confidence in decisions once taken

- Greater competitive advantage
- Improved prospects for change initiatives
- Sharper focus on doing the right things properly
- Reduced waste and fraud, bringing better value for money
- Improved management of contingent and maintenance activities.

M_o_R provides best practice guidelines and techniques for risk analysis and management, the documents necessary for managing a risk programme and a maturity model. It also shows people how to embed these practices, review them, and where necessary adapt them to changing circumstances.

An M_o_R 'health check' can be used to establish how well risk management is embedded in an organization and consequently how to improve it.

FURTHER INFORMATION

WHO IS IT FOR?

M_o_R is aimed at business change managers, programme/project managers, risk management professionals, business and programme/project support staff, and others with responsibilities for identifying, assessing, planning, or managing risks, or reporting on risk management activities across the organization.
