

PRINCE2®

PRACTITIONER COURSE

Introduction

PRINCE2®¹ (Projects IN Controlled Environments, Version2) is a structured method for effective project management. Developed by the UK Government, the PRINCE2® method is internationally accepted as the leading “best practice” project management approach and is widely used in the private and public sectors, both in the UK and internationally.

The course covers the 2009 version and is designed for individuals who have undertaken the 3 day Foundation Course and passed the examination, and now wish to move on to the higher examination level available.

This course reviews the PRINCE2® Project Management methodology and prepares delegates for the PRINCE2® examination which is taken on the final day. Extensive use is made of case study material which is designed to help delegates to consolidate the elements of the PRINCE2® Foundation course, produce the key PRINCE2® management products, discuss PRINCE2® scalability issues and apply the elements of PRINCE2® to a practical scenario as they will be expected to do in the Practitioner exam.
